

FOOT & ANKLE CENTER OF ILLINOIS FORGES AHEAD IN WOUND CARE ADVANCEMENTS!

Submitted by
Foot & Ankle Center of Illinois

Founded twelve years ago in Springfield, IL, the Foot & Ankle Center of Illinois (FACI) has built an exemplary network of clinics in central Illinois that have become the preferred destination for patients with difficult foot and ankle problems. Thousands of patients seek medical assistance from FACI each year in clinics located in Springfield, Decatur, Shelbyville, Sullivan, and Carlinville.

According to its founder John Sigle, DPM, FACFAS, "This past year was a banner year for us. Despite having to endure the difficulties presented by COVID-19, we managed to keep our clinics open and had more than 13,000 appointments. Since our inception in 2011, we have been recognized for offering advanced surgery and

Associate

providing world class diagnostic imaging and technology to our patients. This year, we are expanding our scope of services to bring hope to diabetic patients by offering advanced wound care and experienced wound care specialists."

Diabetic Wound Care Specialist Joins FACI

The Foot & ankle Center of Illinois recently hired a top-notch podiatrist, Keith Beauchamp, DPM, who specializes in diabetic foot care, advanced wound care, and limb salvage. He will offer services to the Decatur and Shelbyville area four days a week. He will be a tremendous asset to the community.

According to Dr. Beauchamp, "I am delighted to join the Foot & Ankle Center of Illinois. I have been practicing for the past twenty-five (25) years in Missouri at the Family Foot Clinic that I owned and operated. I'm so happy to be working here at the Foot & Ankle Center of Illinois. They have so much technology available here including world class imaging, cutting edge lasers, advanced wound care therapy equipment, and

advanced surgery. It's going to be a privilege to work here in Decatur and Shelbyville. There are added benefits for myself and my family because I'm from here. I grew up in rural Illinois farm country near the small towns of Sherman and Williamsville. It's just great to be home again!"

November is Diabetic Awareness Month

Americans across the country are joining the American Diabetes Association to raise awareness of diabetes; and to inspire over 100 million children and adults who have diabetes or prediabetes to live a healthy and active lifestyle.

According to Dr. Beauchamp, "Diabetics have a higher risk of developing foot problems than non-diabetics. These problems relate to peripheral neuropathy, peripheral vascular disease, foot ulcers, skin changes, calluses, toenail fungus, foot deformities, and amputation."

Annual examinations by your podiatrist are essential for any person with diabetes. Frequent visits may be required for the treatment of open wounds or more chronic conditions. Ask your podiatrist about Medicare's Therapeutic Shoe Program for diabetics. This is a fantastic program and one of Medicare's successes. The program provides one pair of diabetic shoes and three pair of special sole inserts every year for free. The shoes and inserts will help prevent a callus and ulcer from developing. Eligibility requirements require a medical confirmation that you have a foot ulcer, nerve function problem, reduced blood flow, previous amputation, or foot deformity such as a hammer toe, claw toe, or bunion. Prescription shoes are a safe and effective way to minimize your risk of chronic problems.

Podiatric technology continues to advance every day. Many of the recent innovations in wound care are bringing new hope to diabetics. Contact Dr. Beauchamp at the Foot & Ankle Center of Illinois at (217)787-2700 if you are interested in advanced wound care therapy and prevention of chronic ulcers. Dr. Beauchamp is accepting new patients at the Decatur and Shelbyville clinic locations. Call (217)787-2700 to schedule a consultation with him or book an on-line appointment at myfootandanklecenter.com.

Foot & Ankle CENTER OF ILLINOIS

Personal Message from Dr. Beauchamp

Hello Decatur, Shelbyville, and Springfield! I am Dr. Keith Beauchamp and I am so happy to be joining the Foot & Ankle Center of Illinois. I have been practicing for the past twenty-five years in Missouri at the Family Foot Clinic.

The Foot & Ankle Center of Illinois has so much technology such as world class diagnostic imaging, cutting edge lasers, vascular testing, and advanced wound care equipment. It's going to be a privilege to work here in Decatur, Shelbyville, and Springfield.

There are added benefits for myself and my family because I'm from here. I grew up on a farm in the Williamsville, Riverton, Sherman area and attended Springfield College of Illinois and the University of Illinois Springfield. I am delighted to return to my hometown area to be close to my family and friends.
